

SecurePIM Government Cloud

Mobile Security.
Simple. **Secure.**

Reliable protection for sensitive data

Robust App for Secure Mobile Productivity

SecurePIM enables government employees to easily and securely access critical data, such as email, contacts, calendars, notes, tasks, documents, intranet and internet pages using their iOS and Android™ smartphones or tablet. The intuitive user interface and automated security eliminates the need for training. Employees can begin using SecurePIM immediately.

Easy Configuration and Deployment

With the SecurePIM Management Portal administrators can, for example, define password strength or data-leakage prevention measures by denying copy-paste inside the SecurePIM app and remote wipe corporate data inside the SecurePIM Container. Deployment of SecurePIM is also easy. Employees simply download the app from the Apple® App Store or Google Play™ and login using their credentials. To make deployment even simpler, there is no need to install a Mobile Device Management (MDM) system.

New: SecurePIM Messenger

With the messenger module in SecurePIM your employees can finally communicate securely and in compliance with GDPR. Instantly send images, locations and voice messages in group chats or one-to-one. Thanks to the full integration into the SecurePIM Container, information stays where it should be - in your hands. And WhatsApp stays private. Messenger for SecurePIM is an optional feature at additional cost.

NEW!

Benefits for Employees:

- + Secure access to sensitive data using smartphones and tablets
- + Intuitive and easy to use
- + All functionalities in one app
- + End-to-end encrypted email and messaging
- + Document editing while online and offline
- + Use of mobile devices for personal data without restrictions

Benefits for Administrators:

- + Total control of government data without affecting the privacy of employees
- + Easy configuration, deployment, and integration into existing infrastructure
- + SecurePIM Management Portal available in the Cloud

Benefits for Security and Compliance:

- + State-of-the art encryption for data at rest and in transit
- + Strict separation of government and personal data via SecurePIM Container technology
- + Functionality for COPE and BYOD scenarios with SecurePIM Container
- + Mobile security in compliance with the EU-GDPR

Mobility – Simple, Powerful, Secure

Controlled Access to Sensitive Data

Administrators can also define mobile user access privileges using the [SecurePIM Management Portal](#) and [SecurePIM Gateway](#). The SecurePIM Gateway secures the access to the internal infrastructure and ensures that users can only access the resources that are assigned to them (without VPN infrastructure and VPN profiles on mobile devices).

Security for Personal or Government Devices

The [SecurePIM Container](#) technology enables a data-centric approach to sensitive data security. Instead of managing an entire device, you secure and control only its public sector data, regardless if it is on a personal or government-issued device.

Powerful Solution for Secure Mobility

[SecurePIM Government for Local Authorities](#) offers a simple yet very powerful and secure alternative to Mobile Device Management. It is easy to install and deploy and fits into any existing infrastructure.

Built-in Secure Email

Within [SecurePIM](#), all data and communication is encrypted. Employees can send and receive S/MIME encrypted emails and sender verification is provided with a unique S/MIME signature.

About Virtual Solution AG

Virtual Solution's primary goal is to unify security and usability for today's mobile working world. Since 1996, we have been developing security solutions that support the needs of an increasingly digital and mobile society.

Compatibility:

- + Available on iOS and Android devices
- + Microsoft® Exchange and IBM® Domino support using ActiveSync
- + Access to files using WebDAV
- + User sync with Active Directory or LDAP

Security and Compliance:

- + Hybrid encryption with RSA-4096 and AES-256
- + Communication via TLS
- + Full S/MIME and IBM Notes encryption

SecurePIM App Modules:

- + Email
- + Contacts
- + Calendar
- + Notes (Exchange only)
- + Tasks (Exchange only)
- + Documents (edit and store files securely)
- + Browser (secure access to intranet and web)
- + Secure Camera
- + Messenger (optional feature at additional cost; only available for Android)
