

SecurePIM Government

Secure Mobile Work for the Public Sector

Government-grade protection on mobile devices

Robust App for On-the-Go Security and Productivity

SecurePIM enables government employees to easily and securely access critical data, such as email, contacts, calendars, notes, tasks, documents, intranet and internet pages using an iOS or Android™ smartphone or tablet. The intuitive user interface and automated security of SecurePIM eliminates the need for training. Employees can begin using it immediately.

Easy Configuration and Deployment

With the [SecurePIM Management Portal](#) administrators can easily define security policies (like password strength or data-leakage prevention measures by denying copy-paste inside the [SecurePIM App](#)) and remote wipe corporate data inside the [SecurePIM Container](#). Deployment of SecurePIM is also easy. Employees simply download the app from the Apple® App Store or Google Play™ and login using their credentials. Alternatively the deployment can be done using a Mobile Device Management (MDM) system.

NEW!

New: SecurePIM Messenger

With the messenger module in SecurePIM your employees can finally communicate securely and in compliance with GDPR. Instantly send images, locations and voice messages in group chats or one-to-one. Thanks to the full integration into the SecurePIM Container, information stays where it should be - in your hands. And WhatsApp stays private. Messenger for SecurePIM is an optional feature at additional cost.

Smartcard Integration

For the highest security requirements, [SecurePIM Government](#) integrates a smartcard as its security anchor. All asymmetric encryption operations are based on private keys stored on and never leaving the smartcard.

Benefits for Employees:

- + Secure access to sensitive data using smartphones and tablets
- + Intuitive and easy to use
- + All functionalities in one app
- + End-to-end encrypted email and messaging
- + Document editing while online and offline
- + Touch ID/fingerprint support

Benefits for Administrators:

- + Total control of government data without affecting the privacy of employees
- + Easy configuration, deployment and integration in almost any existing infrastructure
- + Cloud service as well as on-premise service capabilities for Management Portal

Benefits for Security and Compliance:

- + State-of-the-art encryption for data at rest and in transit
- + Strict separation of government and personal data via SecurePIM Container technology on the same device
- + Can be managed via the SecurePIM Management Portal or with an MDM solution
- + Mobile security in compliance with the EU-GDPR

Mobility – Simple, Powerful, Secure

Controlled Access to Sensitive Data

Administrators can also define mobile user access privileges using the [SecurePIM Management Portal](#) and [SecurePIM Gateway](#). The SecurePIM Gateway secures the access to the internal infrastructure and ensures that users can only access the resources that are assigned to them (without VPN infrastructure and VPN profiles on mobile devices).

Separation of Personal and Government Data

Implemented as a Container solution, [SecurePIM Government](#) provides controlled access of sensitive data by strictly separating it from all other content on the mobile device. All data within the Container is encrypted and protected with a pin, password, or fingerprint, so no other app or unauthorized user can access information in the Container.

Built-in Secure Email

Within [SecurePIM](#), all data and communication is encrypted. Employees can send and receive S/MIME encrypted emails and sender verification is provided with a unique S/MIME signature.

Advanced Security and Support

[SecurePIM Government](#) includes additional security-related penetration tests and code hardening by Virtual Solution AG. Additionally, it includes further integration and configuration services like in-house technical integration tests and Transport Layer System (TLS) encryption configuration for intranet sites.

About Virtual Solution AG

Virtual Solution's primary goal is to unify security and usability for today's mobile working world. Since 1996, we have been developing security solutions that support the needs of an increasingly digital and mobile society.

Compatibility:

- + Available on iOS and Android devices
- + Microsoft® Exchange and IBM® Domino support using ActiveSync
- + Access to files using WebDAV
- + User sync with Active Directory or LDAP

Security:

- + Hybrid encryption with RSA-4096 and AES-256
- + Communication via TLS in accordance with the technical requirements from BSI
- + Full S/MIME and IBM Notes encryption
- + Smartcard integration with support for various smartcard readers

SecurePIM App Modules:

- + Email
- + Contacts
- + Calendar
- + Notes (Exchange only)
- + Tasks (Exchange only)
- + Documents (edit and store files securely)
- + Browser (secure access to intranet and web)
- + Secure Camera
- + Messenger (optional feature at additional cost; only available for Android)
