

SecurePIM Government

# Make mobile work secure for government authorities

Work efficiently and communicate easily  
with smartphones and tablets

Government authorities, public companies and service providers for defense industry must meet high security requirements. The strict secrecy and GDPR guidelines require it. Working and communicating on mobile devices could therefore not be secured sufficiently or only at great expense. Until now.

## Secure mobile working in federal, state & local governments

Enable the secure foundation for mobile communication with SecurePIM Government. The German Federal Office for Information Security (BSI) has reviewed the security architecture and even granted Approval (iOS) or Pre-Approval (Android) for the VS-NfD system solution SecurePIM Government SDS. With the SecurePIM app, your employees can retrieve and send encrypted emails from anywhere, maintain calendars, edit documents, use the Internet and intranet, as well as chat and start phone calls.

## Business messaging – fully integrated and secure

Use GDPR compliant and encrypted chat, file sharing, voice calls and video conferencing: SecurePIM Government offers all important messenger functions. Thanks to integration into the SecurePIM app, all data remains in your hands.

## SecurePIM App Modules

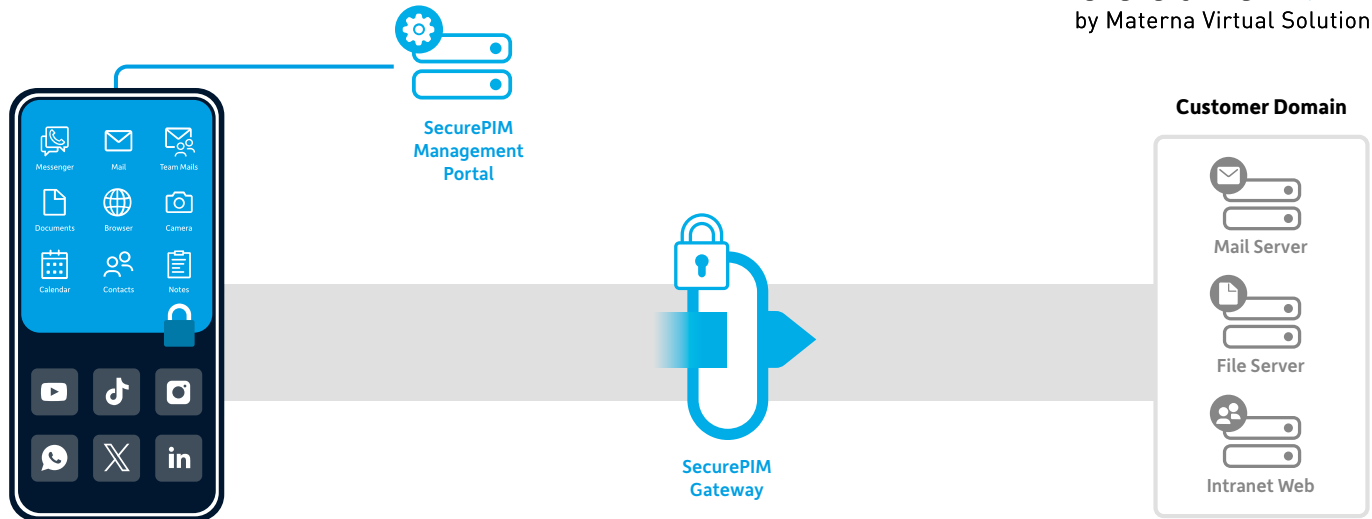

- + Mail
- + Team Mails
- + Contacts
- + Calendar
- + Notes (Exchange only)
- + Tasks (Exchange only)
- + Documents (create, edit and save)
- + Browser (access to intranet and web)
- + Secure Camera
- + Messenger (optional add-on module)

## Compatibility

- + Cross-platform and device-independent for iOS and Android
- + Support for Microsoft Exchange and HCL Domino via ActiveSync
- + File access via WebDAV
- + Synchronization with Active Directory or LDAP

## Security

- + Hybrid encryption with AES, RSA and EC
- + Communication via SecurePIM Gateway
- + Full S/MIME and HCL Domino encryption

## Focus on high usability

Employees are allowed to use what is safe. To ensure that they are happy to do so, SecurePIM Government offers high usability: all relevant office functions intuitive to use – known already by your employees from native apps.

## Free choice of devices and platform-independent

Reduce your operating expenses and offer more choice of devices. SecurePIM Government works platform-independent for iOS and Android with almost all mobile devices. The solution supports Microsoft® Exchange and HCL Domino via ActiveSync. File access is via WebDAV and synchronization with Active Directory or LDAP.

## Only one smartphone for business and private

With SecurePIM Government, you implement COPE and BYOD models quickly and easily. The container technology ensures strict separation between business and private data on one device – no more second smartphone needed.

Please ask us for advise how to integrate [SecurePIM Government](#) into your IT infrastructure. Do you have to comply with legal requirements for working with [classified information \(VS-NfD or NATO RESTRICTED\)](#)? The [SecurePIM Government SDS](#) system solution is approved (Approval for iOS; Pre-Approval for Android) by the German Federal Office for Information Security (BSI). Please contact us for more information.

## The Benefits of SecurePIM Government

### Convenient for your users

- + Secure mobile working with smartphone and tablet
- + Intuitive use without training
- + Everything in one productivity app
- + Use of personal devices possible thanks to strict data separation (BYOD)

### Less effort for your IT

- + Easy configuration and rollout in existing infrastructure
- + Management via SecurePIM Management Portal or via existing MDM system
- + Available as on-premises or cloud solution
- + Can be implemented quickly and with low hardware costs: BYOD models
- + Motivated employees through simple introduction of COPE models

### Peace-of-mind for your compliance officers

- + Encryption of all internal information for data at rest and also for data in transit
- + Strict separation of internal and personal data on the device
- + GDPR compliant with full control over internal information
