

SecurePIM Enterprise

# Mobile working – simple and secure

Dependable protection for your company data

Working and communicating with smartphones and tablets has become standard at most companies. When it comes to data security and protection, however, many companies are lagging well behind the standard. At great risk to their business – especially when dealing with sensitive personal data, corporate secrets or critical infrastructure. To allow employees to work productively from any location, they require an application that is highly secure and user friendly in equal measure.

## All safe and secure in one app with SecurePIM Enterprise

The highest levels of security and an intuitive, mobile working environment – SecurePIM Enterprise fulfils both requirements. Your employees are able to access emails, contacts, calendar, intranet pages and documents – conveniently and in compliance with GDPR – no matter where they are located. At the same time, personal information is as effectively safeguarded against unauthorized access when working mobile as your corporate secrets are. And the managers responsible for making IT decisions? They receive a lean, easy to administrate, cost-saving solution – and the peace of mind that they have done everything right.

## Business and private data on the same phone

Great news for those who like to keep it simple: SecurePIM Enterprise is always the right choice. It facilitates mobile working on a business smartphone or tablet which is also used for private purposes (COPE). Employees can also enjoy the same level of protection working mobile on their private devices (BYOD). The container technology utilized by the communication solution ensures a strict separation of company and private data.

## The benefits of SecurePIM Enterprise

### Practical for your teams

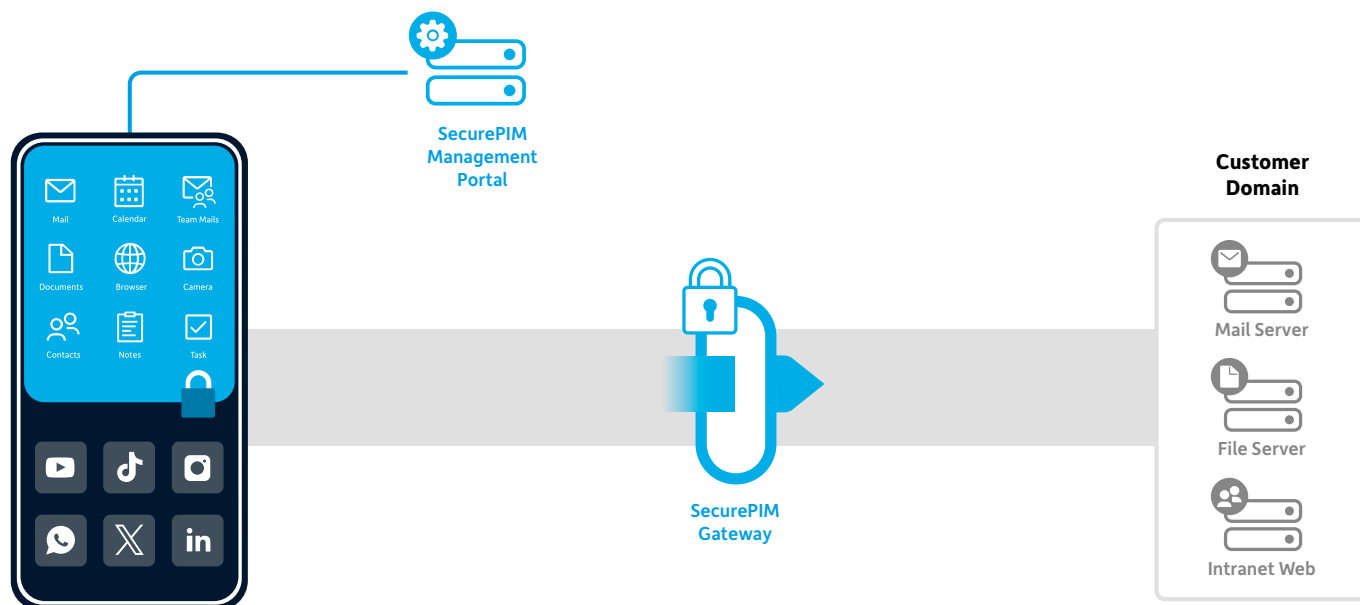

- + Easy, secure communication and access to company data from any location
- + Increased satisfaction through productive mobile working
- + One solution for all needs: suitable for both COPE and BYOD use scenarios

### Reduces the workload of your IT department

- + Fast implementation with minimal project efforts and expenses
- + Available in on-premises or cloud versions
- + Easy to configure and roll out in your infrastructure
- + Flexible operation with & without mobile device management (MDM)
- + GDPR compliant out of the box

### Peace of mind for your compliance officers

- + Separation of company & private data by way of container technology
- + Encryption of corporate information on the device & during transfer
- + Avoiding high financial penalties thanks to GDPR compliant solution

## Full control over access to company data

The SecurePIM solution provides for controlled access to company data to safeguard your value-generating information. The solution also employs the required data encryption, to dispel concerns about negative privacy audits and GDPR fines. Especially for companies which need to display the relevant certificates, this provides significant relief with regard to resources. All this without requiring a VPN infrastructure and profile on the end device. It could hardly be more convenient and secure.

## With or without MDM, always budget-friendly

As a rule, flexibility in the administration of devices is costly for companies. The exception to this is SecurePIM Enterprise: The solution goes easy on your IT budget. You can completely forego mobile device management or continue to work with your existing service. Either way, you save valuable resources which can be deployed more usefully in other ways. And as SecurePIM runs both on iOS and Android devices, no additional modules, costs or efforts are required for administration.

## More compatibility, lower operating costs

- + Cross-platform and device-independent for iOS and Android
- + Supports Microsoft® Exchange & HCL Domino Traveler via ActiveSync as well as Microsoft 365 and Intune
- + Data access via WebDAV
- + Synchronization with Active Directory or LDAP

## Professional protection with SecurePIM security

- + Hybrid encryption with AES, RSA and EC
- + Communication via TLS
- + Full S/MIME support

## Productive on the go: SecurePIM App module

- + Mail
- + Team Mails
- + Contacts
- + Calendar
- + Create, edit and save Office documents securely
- + Browser ensures secure access to internet and intranet
- + Camera with secure storage within the app
- + Tasks and notes in Exchange & Microsoft 365
- + Messenger (optional module)
